

Paul Barrett

Full Stack Developer

I feel the best way to produce the greatest productivity, morale, and team building is through working with and encouraging peers in a positive environment, and have adapted this in my own work style. As a developer, I believe that proper research and adaptation to new environments (languages, technology, etc) is key to being successful.

Skills

- HTML
- CSS
- Javascript
- Time Management
- Adaptability

Projects

- Oct 2018** Tic tac toe - <https://tic-tac-toe-helio.netlify.com/>
- Oct 2018** A mock store app, made with some peers in my class; My main focus was the API/Backend - <https://team-this-store.netlify.com/>
- Nov 2018** Helio Training Collaborative Project | Larry H. Miller Entertainment Group - Web Development Intern: The Stars Application - Asked to be part of a group project to develop a mobile app for the G-League Basketball team The Stars; My contribution has been getting the data from the G-league API to display Player Information, Team Information, Player Stats
